**Subject:** ACW-2019-003 - I-73 - Request for Extension

Good afternoon.

The above noted ACW expires on April 1, 2019.

Strategic is requesting an extension to April 1, 2020. There will be no changes to the proposed operations for the execution of the existing ACW.

The plan was to bring this well into downhole compliance using slickline but those attempts proved unsuccessful. A service rig is needed to pull tubing and set a bridge plug.

ACW-2019-003 was issued on February 25, 2019. Due to unforeseen circumstances, the service rig was demobilized from the Cameron Hills area prior to the downhole work being completed this year.

The well currently has all connections to facilities blinded off.

Pressures on March 15, 2019 were : SITP = 0 and SICP = 5050 kPa.

Please get back to me with any questions or concerns

Thanks

Ken Nikiforuk
