Subject: ACW-2019-004 - J-62 - Request for Extension

Good afternoon.

The above noted ACW expires on April 1, 2019.

Strategic is requesting an extension to April 1, 2020. There will be no changes to the proposed operations for the execution of the existing ACW.

The plan was to bring this well into compliance using slickline but those attempts were unsuccessful. A service rig is needed to pull tubing and set a bridge plug.

ACW-2019-004 was issued on Feb 25, 2019. Due to unforeseen circumstances, the service rig was demobilized from the Cameron Hills area prior to the downhole work being completed.

There are no production facilities on this location.

Pressures on March 15, 2019 were : SITP = 1695 kPa and SICP = 0.

Please get back to me with any questions or concerns.

Thanks

Ken Nikiforuk
