

57-6-4-14 Summary of Seismic Operations - N.W.T. Permits 975-980

Figure 1 consists of six panels, labeled (a) through (f), illustrating the evolution of the 1990s U.S. economy. Panel (a) is a flowchart showing the production process, with inputs like labor and capital leading to outputs like goods and services. Panel (b) is a 4x4 grid of economic indicators, with rows representing different sectors and columns representing different metrics. Panel (c) is a bar chart showing the components of GDP, with bars for consumption, investment, government spending, and net exports. Panel (d) is a bar chart showing the components of GDP, with bars for consumption, investment, government spending, and net exports. Panel (e) is a bar chart showing the components of GDP, with bars for consumption, investment, government spending, and net exports. Panel (f) is a bar chart showing the components of GDP, with bars for consumption, investment, government spending, and net exports.
