

1. The purpose of this survey was to determine the magnetic intensity and magnetic angle of the Earth's magnetic field in the area of the survey.

2. The survey was conducted using a magnetic field meter and a magnetic field recorder.

3. The survey was conducted in the area of the survey, and the results are shown on the map.

4. The survey was conducted in the area of the survey, and the results are shown on the map.

5. The survey was conducted in the area of the survey, and the results are shown on the map.

6. The survey was conducted in the area of the survey, and the results are shown on the map.

7. The survey was conducted in the area of the survey, and the results are shown on the map.
