

62-6-4-14 Reflection Seismic Survey - Camsell Bend Area, N.W.T.

62-6-4-14 Reflection Seismic Survey - Camsell Bend Area, N.W.T.

1. The purpose of this survey is to determine the location and extent of the Camsell Bend area N.W.T. and to provide a basis for the development of a plan of the area.

2. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

3. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

4. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

5. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

6. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

7. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

8. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

9. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

10. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

1. The purpose of this survey is to determine the location and extent of the Camsell Bend area N.W.T. and to provide a basis for the development of a plan of the area.

2. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

3. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

4. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

5. The survey was conducted by the Department of the Interior, Geological Survey, and the results are presented in this report.

62-6-4-15 Seismic Report on Fort Providence Area, N.W.T.

62-6-4-15 Seismic Report on Fort Providence Area, N.W.T.

1. The purpose of this report is to provide a summary of the seismic data collected during the 1962-63 field season at Fort Providence, N.W.T. The data were collected by the Canadian Geological Survey, and are being made available to the public for their information.

2. The seismic data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments. The data were collected at various locations throughout the Fort Providence area, and are being made available to the public for their information.

3. The seismic data were collected during the 1962-63 field season, and are being made available to the public for their information. The data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments.

4. The seismic data were collected during the 1962-63 field season, and are being made available to the public for their information. The data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments.

5. The seismic data were collected during the 1962-63 field season, and are being made available to the public for their information. The data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments.

6. The seismic data were collected during the 1962-63 field season, and are being made available to the public for their information. The data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments.

7. The seismic data were collected during the 1962-63 field season, and are being made available to the public for their information. The data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments.

8. The seismic data were collected during the 1962-63 field season, and are being made available to the public for their information. The data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments.

9. The seismic data were collected during the 1962-63 field season, and are being made available to the public for their information. The data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments.

10. The seismic data were collected during the 1962-63 field season, and are being made available to the public for their information. The data were collected using a variety of methods, including the use of seismographs, accelerometers, and other instruments.

Station	Latitude	Longitude	Altitude	Seismic Data
1	66° 30' N	113° 30' W	1000 ft	1000
2	66° 30' N	113° 30' W	1000 ft	1000
3	66° 30' N	113° 30' W	1000 ft	1000
4	66° 30' N	113° 30' W	1000 ft	1000
5	66° 30' N	113° 30' W	1000 ft	1000
6	66° 30' N	113° 30' W	1000 ft	1000
7	66° 30' N	113° 30' W	1000 ft	1000
8	66° 30' N	113° 30' W	1000 ft	1000
9	66° 30' N	113° 30' W	1000 ft	1000
10	66° 30' N	113° 30' W	1000 ft	1000

Station	Latitude	Longitude	Altitude	Seismic Data
11	66° 30' N	113° 30' W	1000 ft	1000
12	66° 30' N	113° 30' W	1000 ft	1000
13	66° 30' N	113° 30' W	1000 ft	1000
14	66° 30' N	113° 30' W	1000 ft	1000
15	66° 30' N	113° 30' W	1000 ft	1000
16	66° 30' N	113° 30' W	1000 ft	1000
