

LIARD HINGE LINE
 AREA A

9230-1P

SIGNIFICANT GEOLOGIC FEATURES OF THE LIARD HINGE LINE MACKENZIE BASIN AREA

This map depicts significant stratigraphic and structural features
 of the Liard Hinge Line.

MILES 0 10 20 30 40 50
 KILOMETERS 0 10 20 30 40 50

SCALE 1 : 500,000
 1 INCH = 8 MILES (approx.)

LEGEND

- U Fault; U on upthrown side.
- Depositional or erosional limit of stratigraphic unit prior to burial by overlying strata.
- Limit of cover by younger rocks.
- Facies change.
- Line of cross section.
- Thickness in meters of Middle Devonian and older Paleozoic rocks.
- Basement rocks not reached.

For stratigraphic ages and relationships see
 Stratigraphic Correlation Chart - Figure 3.

STRUCTURAL CROSS SECTION DRAWN ACROSS LIARD UPLIFT
