Dear Mr. Lepine:

Re: Application To Alter Condition Of A Well
Paramount et al Cameron N-28 ~~et al~~
Paramount et al Cameron B-08
Paramount et al Cameron I-16
Paramount et al Cameron C-50
Paramount et al Cameron J-37

Please find enclosed in triplicate the Application To Alter Condition Of A Well for the subject wells.

The N-28 well was started last winter with minimal work finished due to warm weather at the end of the winter season. Some additional work has been proposed depending on results. We would like to start work on this well as soon as possible and would like to know if the previous application is still valid to enable us to evaluate the Keg River.

The B-08 program involves an AOF test. On the initial completion, weather and time constraints prevented the full testing program to be finished.

T.M.

Mr. F. H. Lepine
Director - Exploration Division
Engineering Branch

Your early reply to these applications would be greatly appreciated. It has taken considerable time to finalize these programs and our activity window in the Cameron Hills is rather short. However, we are hoping to be able to finish our planned activities this winter.

If there are any questions, please contact the undersigned at (403) 266-2047.

Yours truly,

PARAMOUNT RESOURCES LTD.
