

File No.: 1795

July 7, 1994

Mr. B. Collin  
Amoco Canada Petroleum Co. Ltd.  
333 - 3rd Avenue S.W.  
Calgary, Alberta  
T2P 2H8

Dear Mr. Collin:

**RE: Application to Alter Condition of a Well**  
**Pan Am Pointed Mountain K-45A**

Approval to alter the condition of the well Pan Am Pointed Mountain K-45A in accordance with the *Canada Oil and Gas Drilling Regulations* is granted with the following conditions.

The blowout preventer must be pressure tested, prior to program commencement, in accordance with the *Canada Oil and Gas Drilling Regulations* section 115 (iii) and (v).

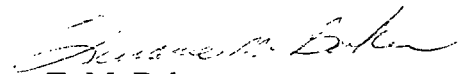

The 178mm x 244mm and 244mm x 340mm casing annuli must be left in such a condition that any formation fluid or formation pressure is isolated from surface prior to running the tubing for well completion.

Amoco Canada Petroleum Co. Ltd. is to ensure all well testing equipment is spaced according to the Alberta Recommended Practices for well testing prior to flowing or swabbing in the well.

Operations are to be conducted as contained in the program submitted July 7, 1994. Any changes or major deviation from the program will require the additional specific approval of the Chief Conservation Officer. All pressure tests are to be conducted in accordance with section 116(3) of the *Canada Oil and Gas Drilling Regulations*.

Please note that the NEB will require a copy of the minutes of all pretreatment safety meetings.  
If you have any questions, please do not hesitate to contact this office at 299-2792.

Yours sincerely,

T. M. Baker  
Manager,  
Development Engineering
