

Oil and Gas

## Daily Operations Report

11520E(9412)

1555

Location	PCI Tweed Lake A-67	Date	2003-08-11	Report No.	1
Job Description	Field Inspection to Check Wellbore Integrity	AFE or Prep. Code	B963006	Amount	
Tubing pressure:	0 kPa	Casing pressure:	0 kPa	H2S conc.	0

Travelled to location on Canadian 206L helicopter out of Norman Wells. Aerial inspection of location, okay. No standing water on location, no staining. Found surface casing vent open. Performed 10 minute bubble test; no bubbles. Checked tubing and casing pressures, both 0. Took several wellhead and location pictures. Wellhead appears to be not sitting perfectly upright. Measured and calculated wellhead to be leaning 6° or 7° to one side. Cased mouse hole still in position. Re-chained and locked wellhead.

**NOTE:** Wellhead is a 21 MPa McEvoy with single 65 mm master valve, single 52 mm casing valve and R45 tubing bonnet.
